Thanks. Let's talk about it at AC. Graphic overlays would be good.

Some stats which may save you some review time. I did it quickly but it should be fairly accurate.

Of the courses that go from at 5-7:20, 7 are one credit courses, 3 are two credit courses, 4 are three credit courses that end at 7:20 or 7:30 and one is the 5-hour EMT which would be exempt anyway.

Of the courses that begin at 5:15, 44 of them are 3 credit courses that end at 7:45, 4 are biology labs of 1 credit but meet for 3 hours and end at 8:05, and the rest are either 1 credit courses that end by the correct ending time or are 3 or 4 credit courses that meet two nights a week and stay within the ending bell schedule.

Of the courses that begin at 5:30, 5 end at 7:50, the rest fit.

Of the courses that begin at 6, 8 are Hurricane courses that begin at 6 and end at 8:30, 1 meets at 6-7:40 two nights a week. There are 7 courses that meet two nights a week and are within the bell schedule.

Actually there are two pieces of information about the courses on campus.

1. What are the ENDING times?
2. What are the CREDITS assigned to these courses?
