

**KIRTON & McCONKIE**

Dear Colleagues and Friends,

We are proud to present the new editions of the DAAD informational materials for the 2009-2010 academic year, including our annual funding catalogue *Grants for Study and Research in Germany*.

Among the highlights for the upcoming year: a reprise of our wildly successful program, RISE (Research Internships in Science and Engineering). We introduce a groundbreaking journalism internship, InternXchange. And of course the traditional DAAD Study Scholarship, which has many students pursuing the not-so-traditional route of an entire international graduate degree at a German university.

Enclosed in this package are:

1. Grants for Study and Research in Germany

This booklet gives an overview of all the DAAD funding opportunities for students and faculty in the United States and Canada. The brief descriptions with vital statistics help those interested in pursuing study, research, internship, and funding opportunities for special projects in Germany decide which program will suit their needs.

2. Undergraduate Scholarships in Germany

This pamphlet features all of the DAAD opportunities open to undergraduate students. Useful for undergraduate advisors and students alike, it lists deadlines and requirements to help with planning how and when to apply for scholarships.

3. RISE and RISE professional – Research Internships in Science and Engineering

This pamphlet describes our most popular internship programs for undergraduate students (RISE) and graduate students (RISE professional) in science and engineering fields.

Additional copies of our annual funding catalogue and all of our publications, in electronic and paper hard copy formats, can be ordered on the following page of our website:  
[www.daad.org/?p=pub\\_fac](http://www.daad.org/?p=pub_fac)

We hope that you will place them in areas with public access, or distribute them to your colleagues, students, and other interested parties. DAAD provides unrivalled opportunities for international educational experiences to Germany, and an unparalleled breadth of funding programs – please help spread our word so that we can help your constituents achieve their academic goals.

Vielen Dank! And all the best for the coming academic year,

Your DAAD North America Team
